CLIMA CANAL

COMPLETE CLIMATE CONTROL, POWERFUL AND DISCREET

The Jaga floor convector heaters offer the ideal climate solution, they provide comfortable heating and cooling at a very low noise level without hindering your outside view. An additional advantage is the optimal distribution of hot (or cool) air throughout the area.

Jaga Clima Canals provide answer to cold trap in large glass areas. The downward cold airflow at glass walls often creates an uncomfortable comfort feeling. Clima Canals create a warm air curtain. The cold air layer of the window is drawn against the floor, warmed and mixed with the warmer upper air, achieving a balanced and even comfort temperature. This is done extremely efficiently due to the placement of the heat exchanger on the window side of the well. Jaga Clima Canals provide answer to cold traps at large glazed areas. The downward cold air flow at glass walls often creates an uncomfortable comfort feeling. Clima Canals create a warm air curtain. In heating mode, the cold air layer of the window is drawn against the floor, warmed and mixed with the warmer upper air. In cooling mode, the warmer upper air is pressed against the floor inside the room and re-circulated across the floor to the window section, and cooled by the heat exchanger, achieving a balanced and even comfort temperature throughout the room. This is done extremely efficiently due to the placement of the heat exchanger on the window side of the well.

Clima Canal is more than just heating. The units can be equipped with a ventilation connection to provide a completely invisible, comfortable and preheated fresh air supply. Combined with a heat pump, the Clima Canal is also a powerful cooler.

SOPHISTICATED DESIGN

Clima Canals offer powerful climate technology from minimal installation depths. After finishing, only the grille remains visible, which can be adapted to the interior flawlessly thanks to the wide variety of colour options and materials available. With all the internal components coated dark grey, the entire interior is designed to be invisible.

For safety and performance purposes, floor convectors must not be covered by furniture or window coverings. Therefore, the space between the unit and the window should be considered when fitting curtains and blinds to ensure they do not touch the unit. For optimal comfort, the floor duct is preferably the same length as the window.

Clima Canal 13 B27

Width 27
4-pipe

QUALITY WITHOUT CONCESSIONS

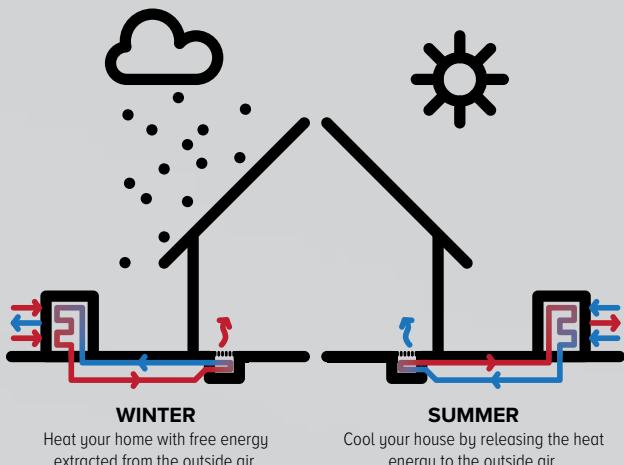

The use of high-quality materials, such as copper and aluminium for the heat exchanger and electro-galvanised steel for the duct, provides a perfect rustproof end product, with all its components carefully coated with a UV-resistant polyester paint of the highest quality. The specially selected EC motor operates in a sealed dust-free environment with a balanced and vibration-free movement.

HEATING AND COOLING WITH HEAT PUMP

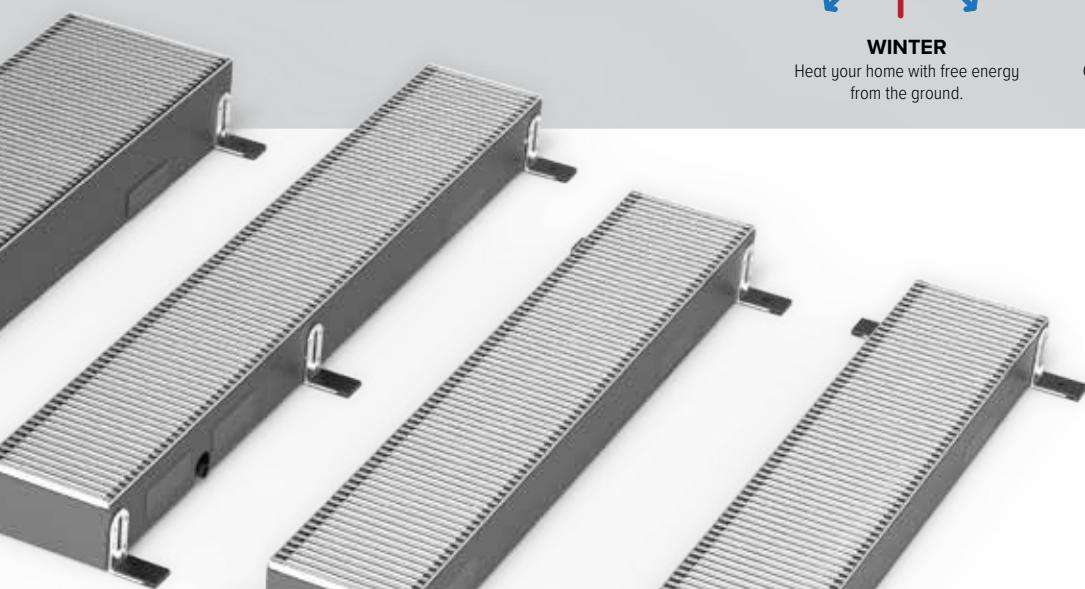

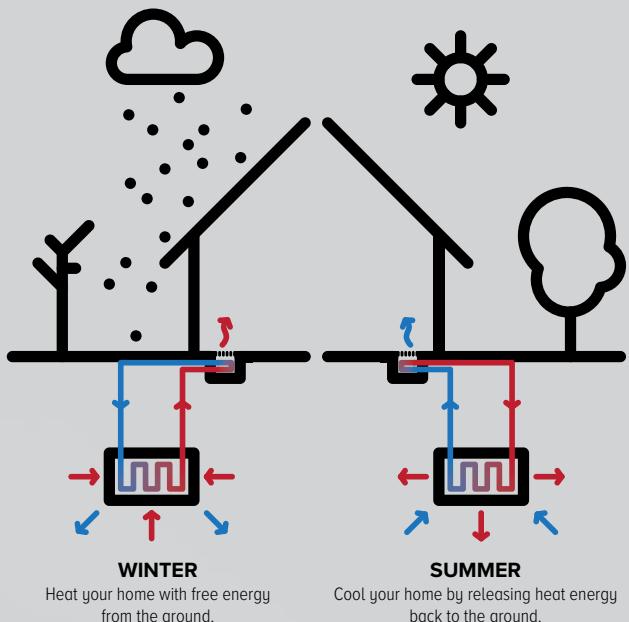

With its low water content and high thermal conductivity coefficient for low supply temperatures, the Clima Canal is the ideal match for your heat pump and it allows the units to react extremely efficiently to your heating or cooling demands, even at low supply temperatures.

Depending on your cooling needs, you can opt for Light or Deep Cooling. Clima Canal 08 is ideal for Light Cooling (non-condensing cooling). Clima Canal 10, 13 and 19 are supplied with a condensation drain and are therefore suitable for Deep Cooling (condensing cooling).

CLIMA CANAL - OVERVIEW GRILLES

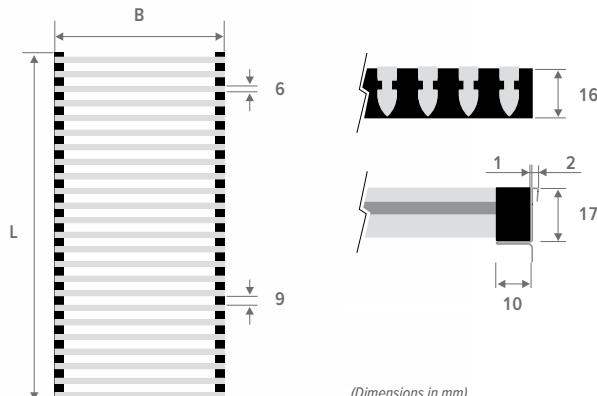

ALUMINIUM GRILLES

Aluminium panel grille with aerodynamically shaped transverse profiles in black vibration-free EPDM, grille supports EPDM rubber hardness 85.

BENEFITS

- provided as standard to enable continuous installation
- sound-insulating EPDM rubber supports
- developed for easy maintenance of the units
- / the aluminium profiles are low maintenance
- eco-friendly, scratch-resistant powder coating with high UV-resistance

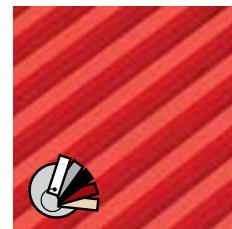

(Dimensions in mm)

ALUMINIUM NATURAL COLOUR ANODISED GRILLES

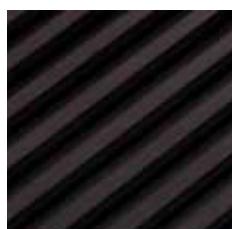

BNA Alu. natural

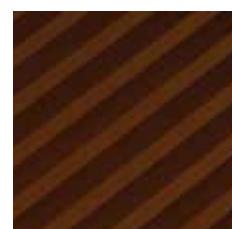

BNC/XXX Alu. coated

⚠ Our grilles are available in all colours, with the exception of Sand blast grey 001. In case of intensive use (installation in circulation areas, for example in front of sliding windows and doors), wear is evidently inevitable.

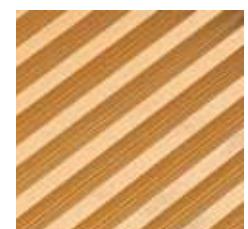

COLOURED ANODISED ALUMINIUM GRILLES

BAN/AN1 Black

BAN/AN2 Dark brown

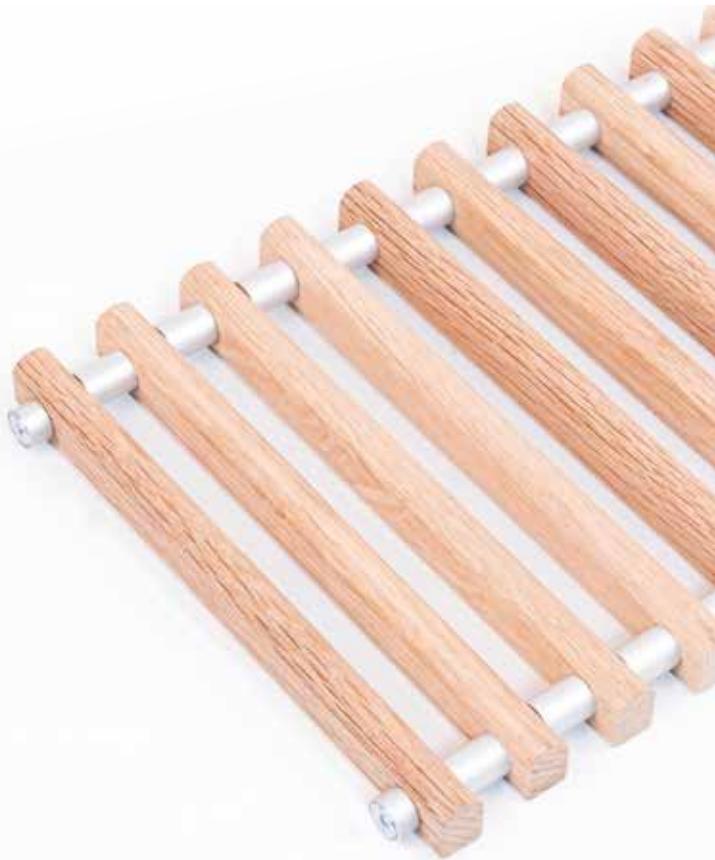

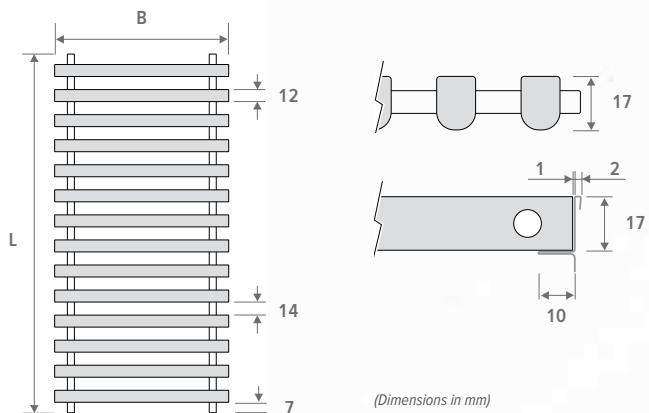

BAN/AN3 Brass-coloured

WOODEN ROLL-UP GRILLES

Wooden grille with aerodynamically shaped transverse profiles, connected with a galvanised spring. Aluminium inserts are used to ensure the correct clearance.

BENEFITS

- provided as standard to enable continuous installation
- eco-friendly, scratch-resistant powder coating with high UV-resistance
- natural colour (untreated), allowing the customer to finish the grille to match the floor

HEIGHT ADJUSTMENT SCREW

EC FANS

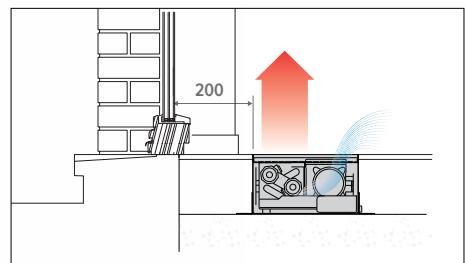

OPTIONAL NOZZLE(S) for ventilation duct

DUCT with stainless steel grille support
coated housing in sendzimir galvanised steel plate

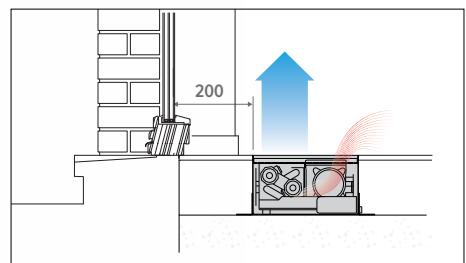

INSTALLATION

- For the distance between the duct and the window, any wall-mounted cornices must be taken into account. Curtains can never be suspended over the duct. The heating element needs to be accessible for maintenance at all times.
- Curtains to the floor: Place the unit at least 20 cm from the window.
- If the unit is not mounted directly onto the even floor, the space between the underside of the unit and the floor needs to be filled with a stable type of filling, such as in-situ concrete.
- Always install with the heat exchangers facing the window or the wall
- Connections always on the left

Operating principle Heating

Operating principle Cooling

Stainless steel flexible hoses allow the internal mechanism to be removed completely for easy cleaning

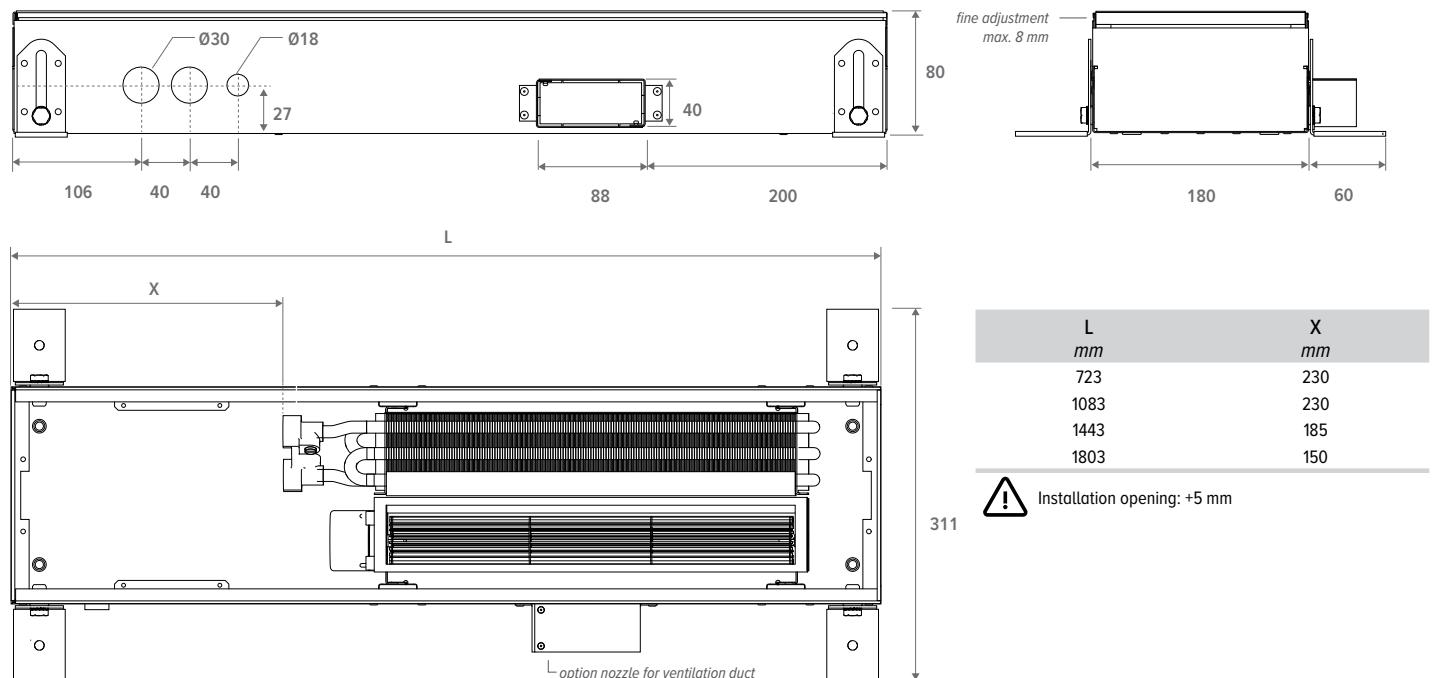

Through-mounting

All Clima Canal are prepared for continuous installation. Visually from the outside, there is only one nice lined-up Clima Canal, but under the floor each Clima Canal has its own connection.

FINE ADJUSTMENT to max. +0.8 cm, for a perfect alignment with the finished floor

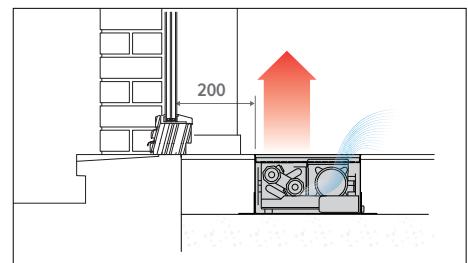

OPTIONAL NOZZLE(S) for ventilation duct

DUCT with stainless steel grille support coated housing in sendzimir galvanised steel plate

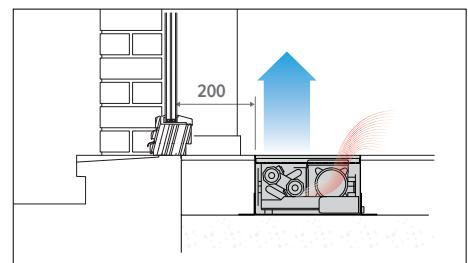

INSTALLATION

- For the distance between the duct and the window, any wall-mounted cornices must be taken into account. Curtains can never be suspended over the duct. The heating element needs to be accessible for maintenance at all times.
- Curtains to the floor: Place the unit at least 20 cm from the window.
- If the unit is not mounted directly onto the even floor, the space between the underside of the unit and the floor needs to be filled with a stable type of filling, such as in-situ concrete.
- Always install with the heat exchangers facing the window or the wall
- Connections always on the left

HYDRONIC CONNECTION

HYDRONIC CONNECTION

2-pipe

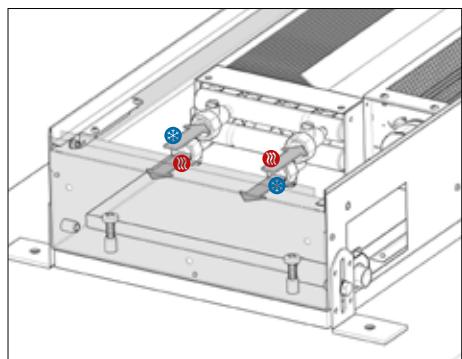

the two-pipe heat exchangers with single-sided connection are always connected to the leftside of a two-pipe installation

4-pipe

the 4-pipe heat exchanger with single connection is always connected to the left of an installation with two separate hydronic circuits

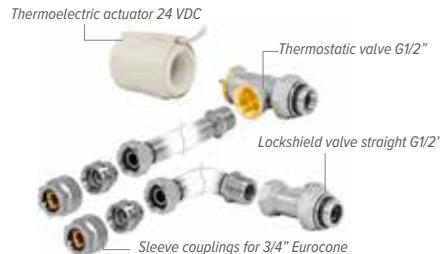

General

always install with the heat exchangers facing the window or the wall

OPTION: CONNECTION SETS

Connection set with Jaga two-way valve 24 VDC 1/2" without default setting

KVS 1.0 - without default setting
set 298

CODY WA4 24 4...	24 VDC
CODY WA4 10 4...	0..10 VDC

Jaga lockshield valve and thermoelectric drive 230 VAC

- only suitable for assembly on the manifold, not in the Clima Canal
- with varistor to protect against overvoltage
- with position indicator (open/closed)

Kv max. 1.0

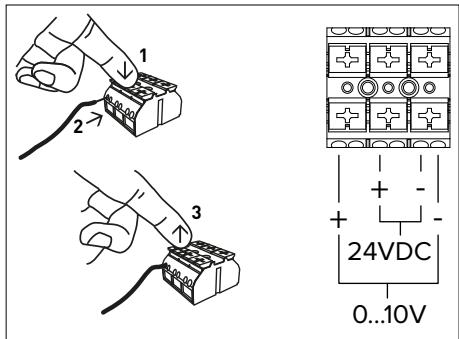

CODE

7990 409	180° - G1/2" F / NG 230V 1 Watts
7990 411	180° - G3/4" F / NG 230V 1 Watts

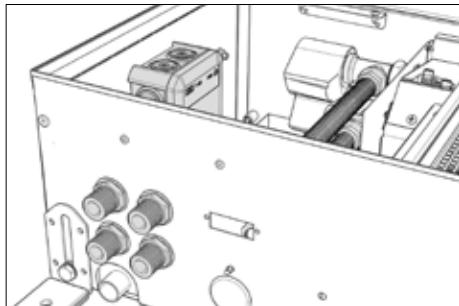

ELECTRICAL CONNECTION

ELECTRICAL CONNECTION

- clamp connector for 24 VDC electrical connection on the left, to be connected via external power supply.
- controlling fan speed with 0-10 V signal
- the warranty only applies when original Jaga power supplies were used

On the side of the hydronic connection, you can also find the terminal block for the electrical connection. The electrical connection is connected to the black block at the base of the protective cover.

OPTION: POWER SUPPLIES

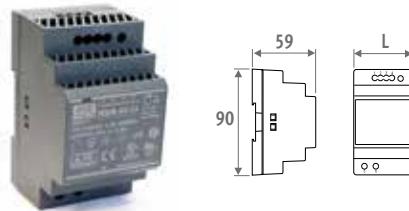

Waterproof power supply 24 VDC with waterproof cable gland

- with waterproof swivel nut connector
- in compliance with UL1310 - EN 60950-1 / Class II
- output voltage 24 VDC
- input voltage 100 - 240 VAC
- output current 1.67 A
- output 40 Watts
- dimensions L 14.5 x B 4.5 x H 3.0 cm

CODE	OUTPUT Watts	OUTPUT CURRENT A
37603 010002	40	1.67
37603 010008	60	2.40

Power supply DIN-rail assembly

- for DIN-rail or wall mounting in a electrical switchboard
- in compliance with UL60950 / UL508 / IEC 60950-1 / TUV EN61558-2-16 / Class II
- output voltage 24 VDC
- input voltage 100 - 240 VAC
- screw connection
- LED indicator

SAMPLE WIRE DIAGRAMS ELECTRICAL INSTALLATION

Jaga aims to simplify your installation process with these sample diagrams. Perfectly align your power supply, thermostatic valve mounting, control system, pipe system, temperature monitoring and number of units per area. Here, you can find the most common combinations. Feel free to ask for more variations at info@jaga.com.

1. POWER SUPPLY

Option 1: component power (inside the unit)

Option 2: power supply DIN-rail assembly (outside the unit)

2. THERMOSTATIC VALVE

Option 1: on the tap (inside the unit)

Option 2: on the collector (outside the unit)

3. CHOICE OF CONTROL SYSTEM

Option 1: thermostat JRT-100TW

Option 2: thermostat JRT-100

Option 3: thermostat JRT-200

Option 4: thermostat RDG160T

Option 5: home automation

4. HYDRONIC

Option 1: two-pipe system

Option 2: 4-pipe system

5. TEMPERATURE MONITORING

Option 1: with temperature monitoring

Option 2: without temperature monitoring

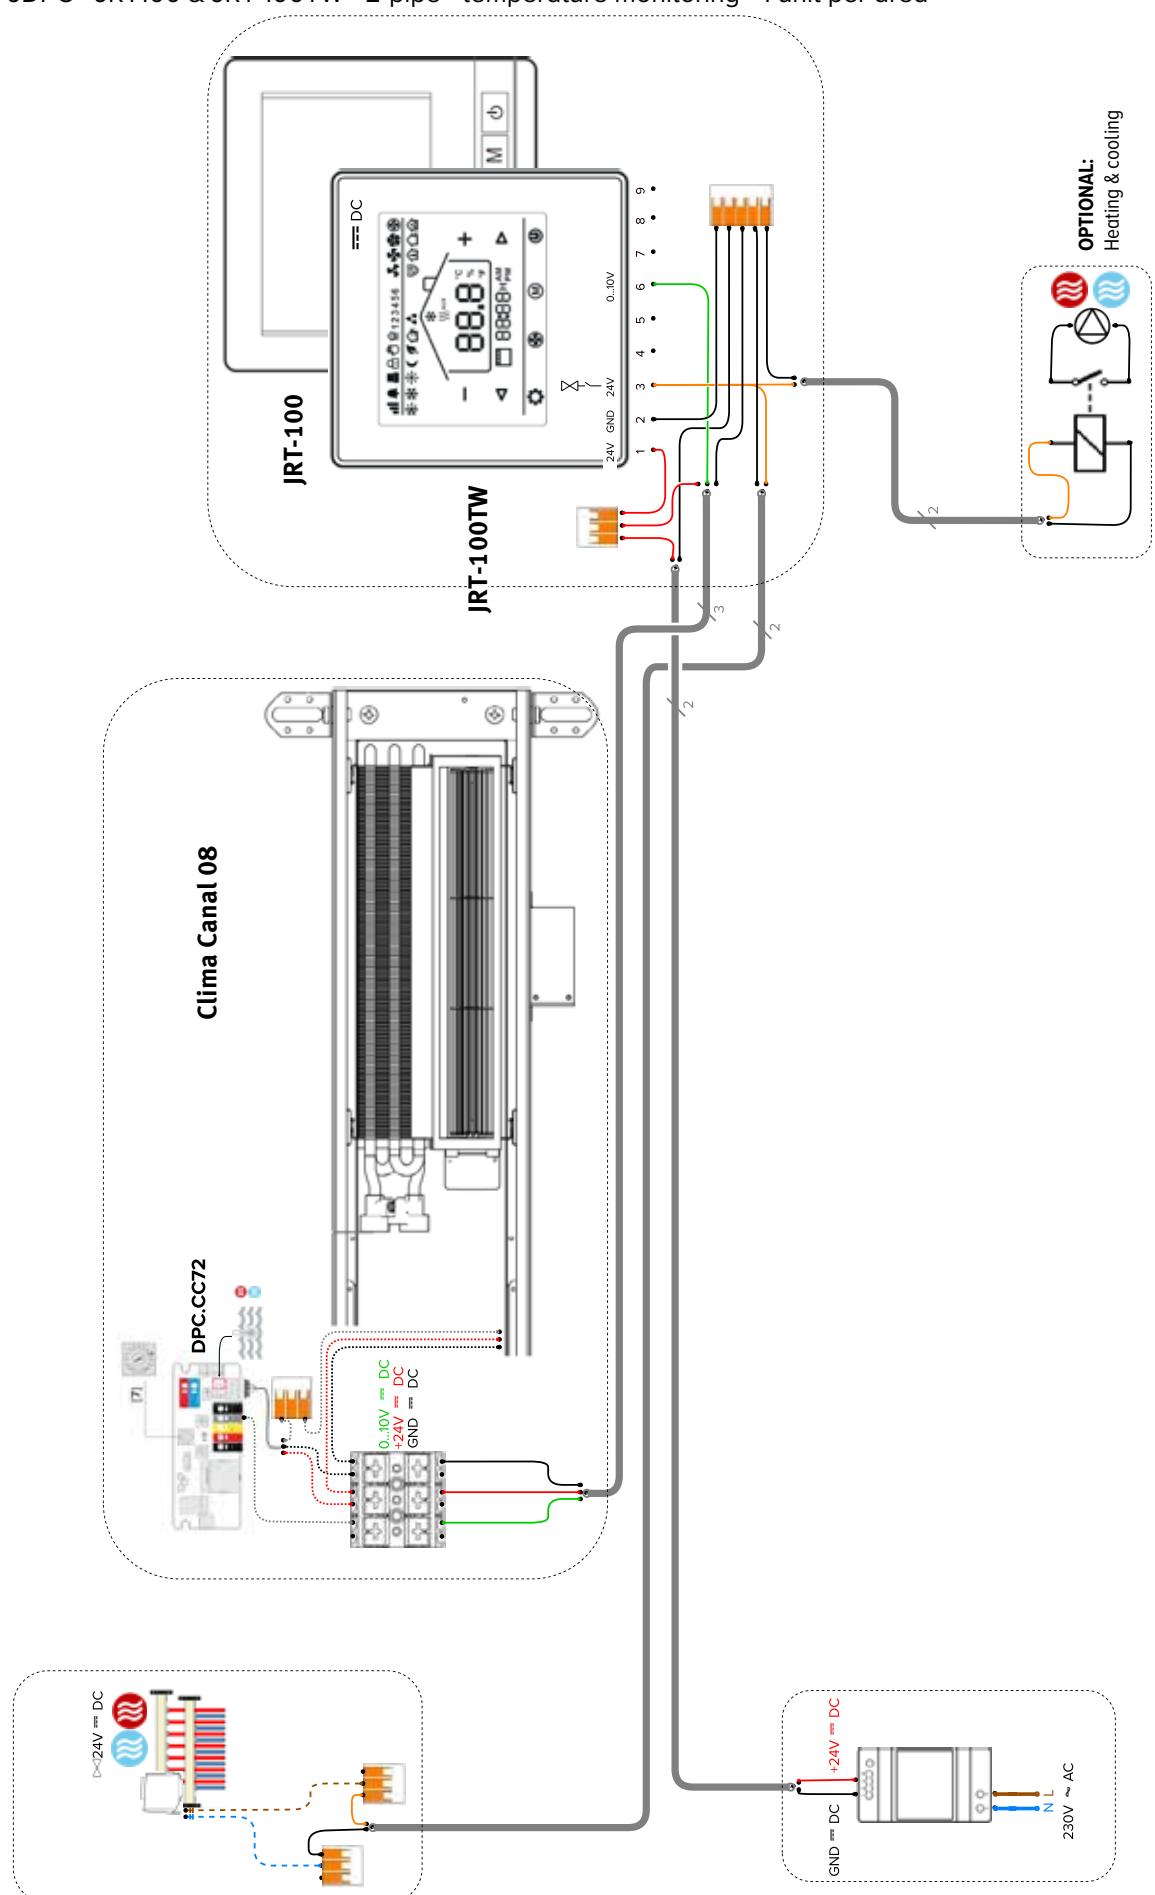

6. UNITS / ZONE

Option 1: one unit

Option 2: multiple units

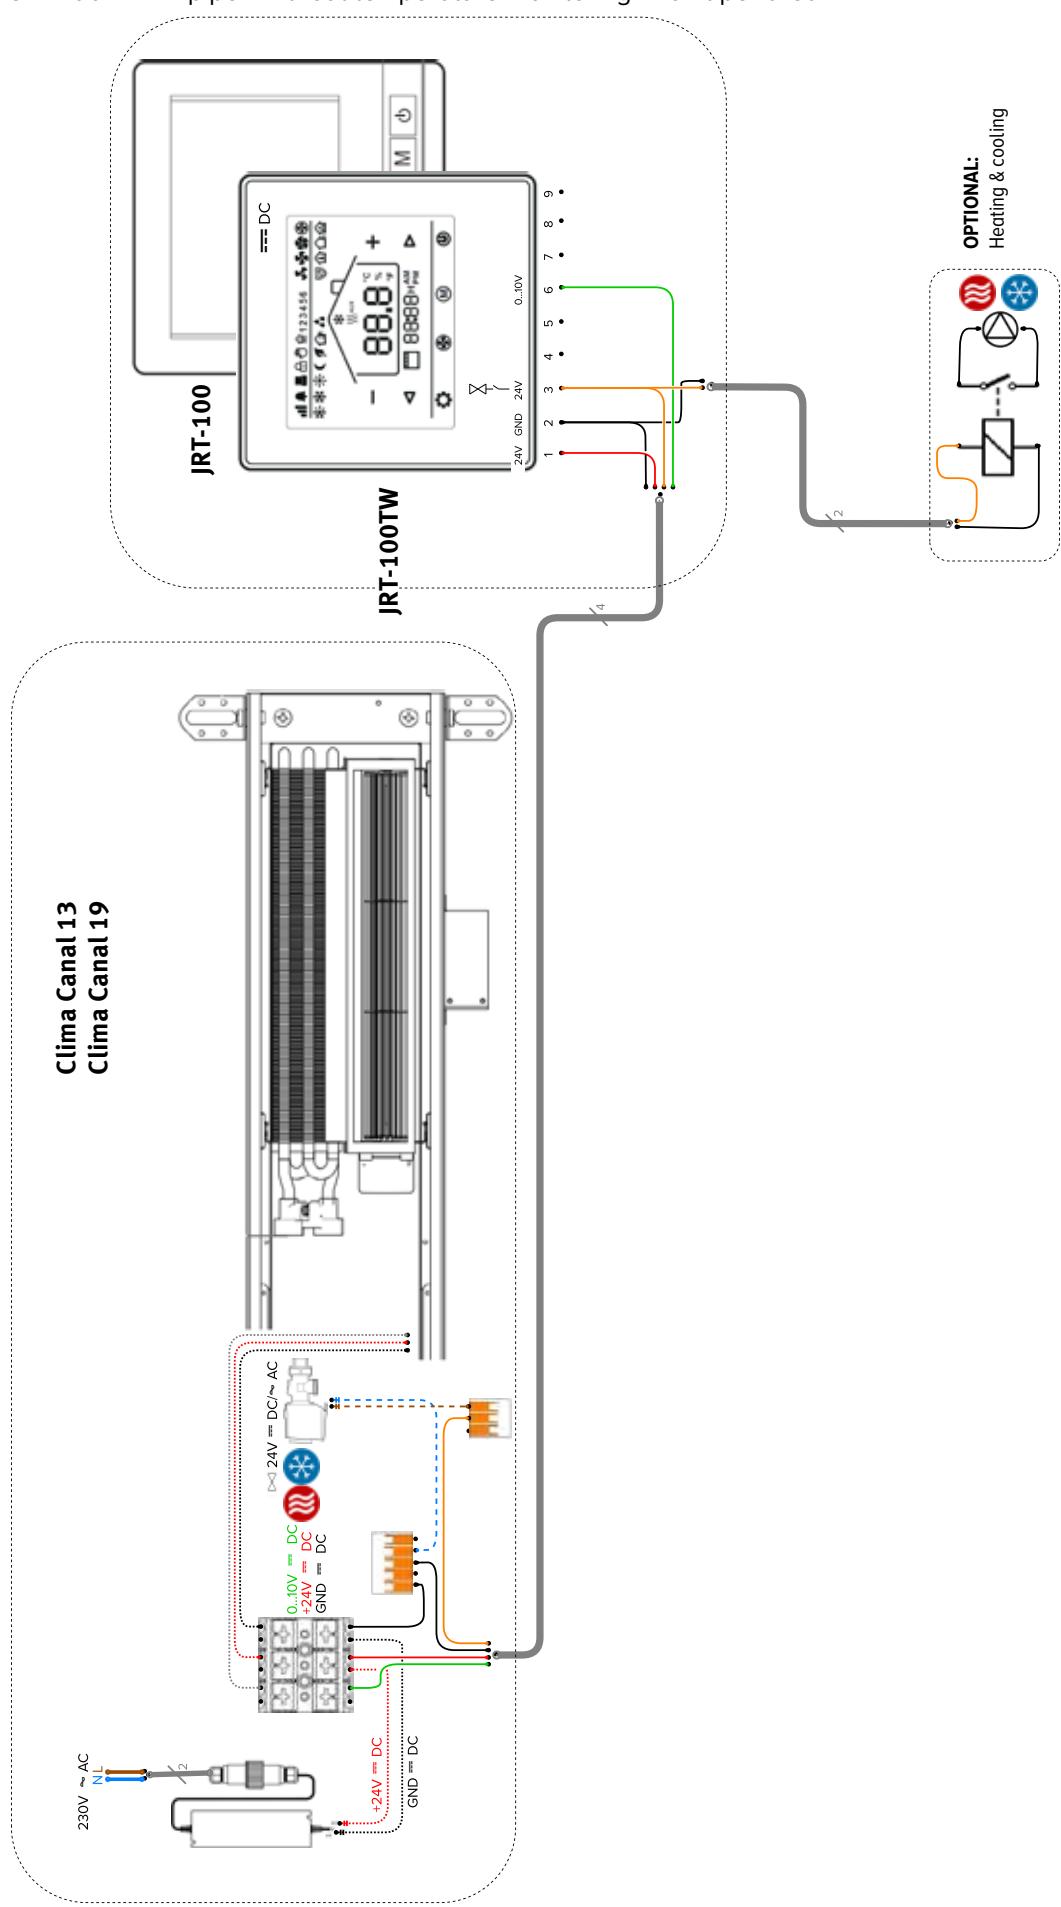

SAMPLE DIAGRAM 1: CLIMA CANAL

power supply DIN-rail assembly - thermostatic valve outside the unit -
 JDPC - JRT100 & JRT 100TW - 2-pipe - temperature monitoring - 1 unit per area

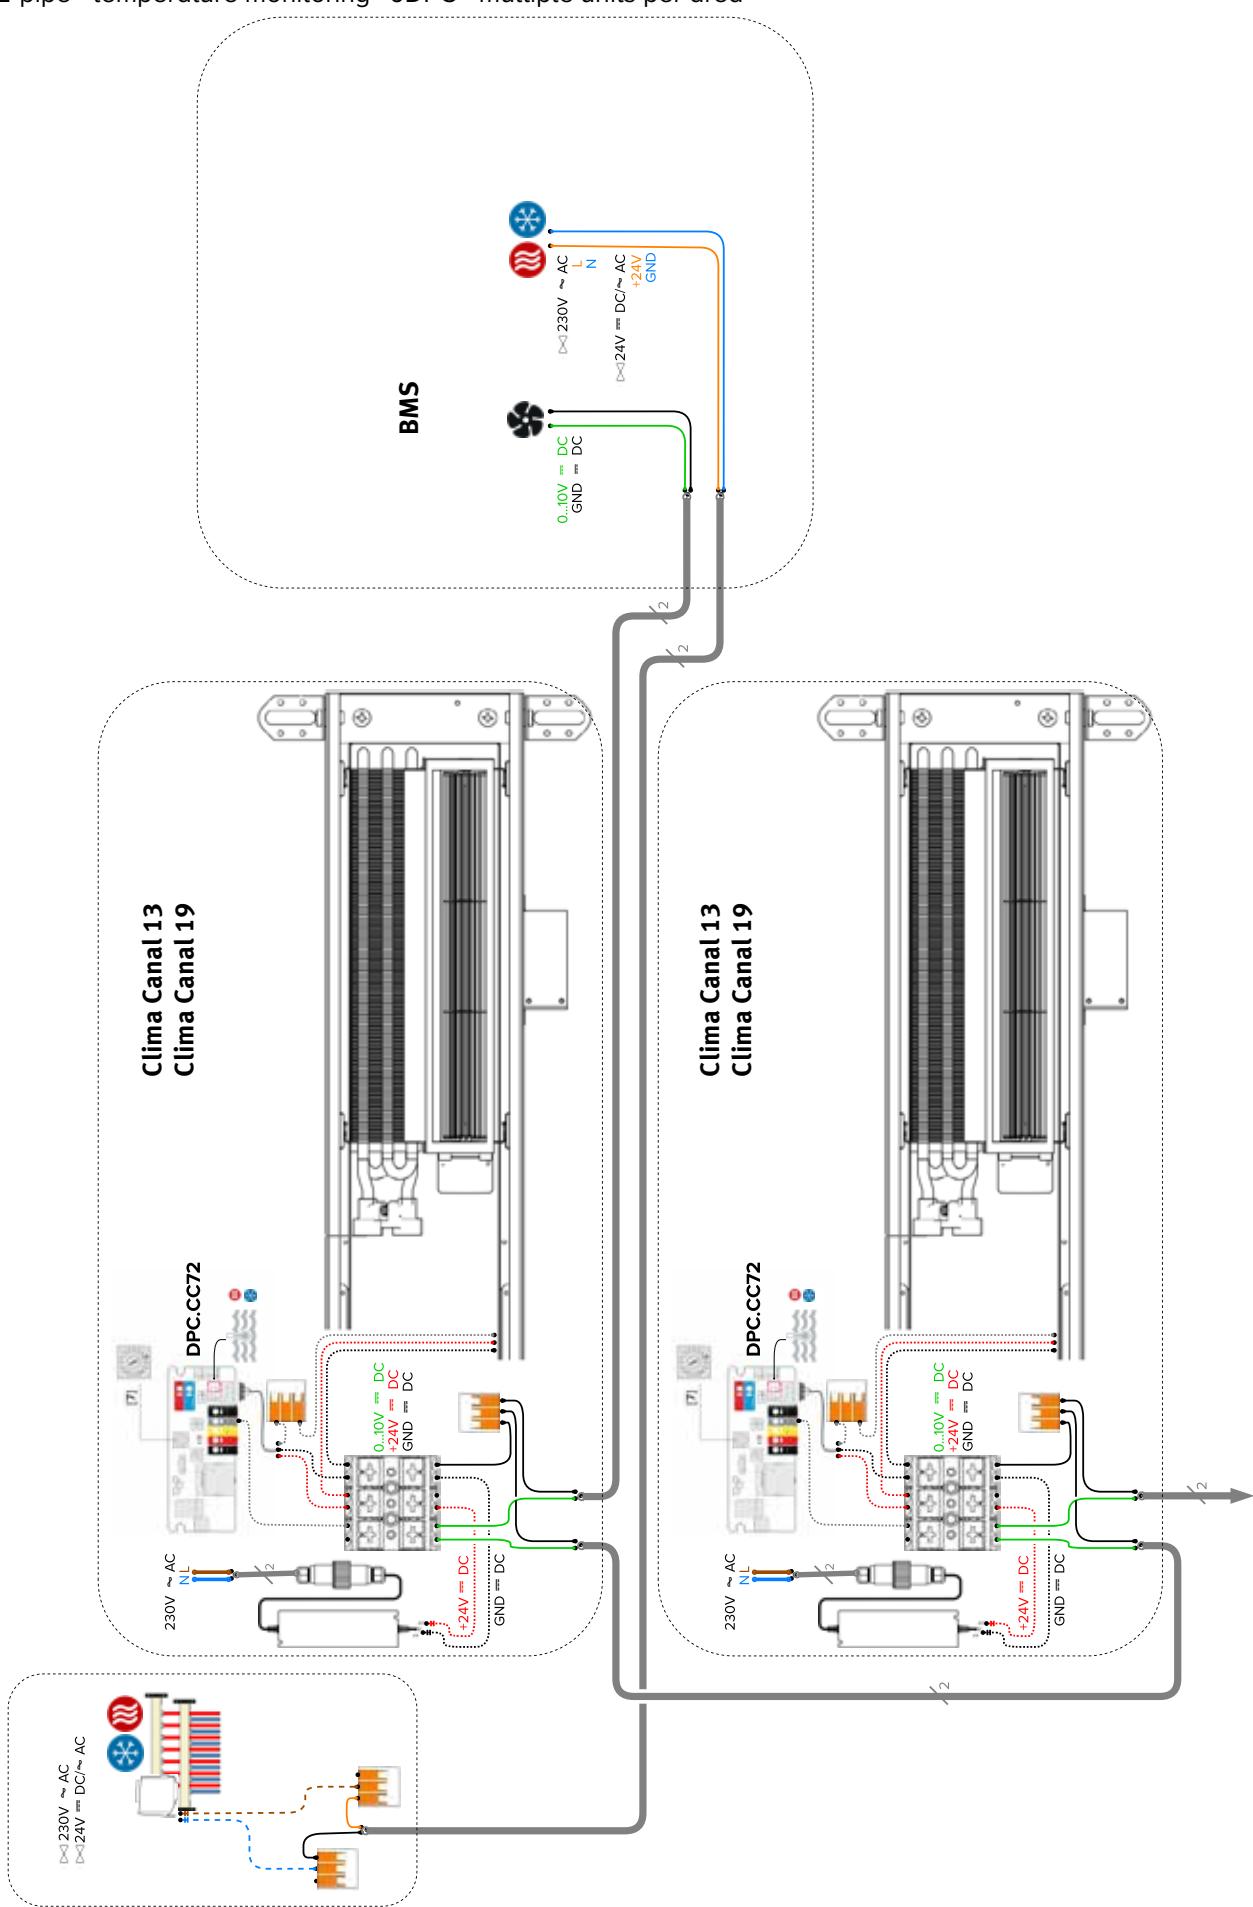

SAMPLE DIAGRAM 2: CLIMA CANAL

component power - thermostatic valve inside the unit -
 JRT100 & JRT 100TW - 2-pipe - without temperature monitoring - 1 unit per area

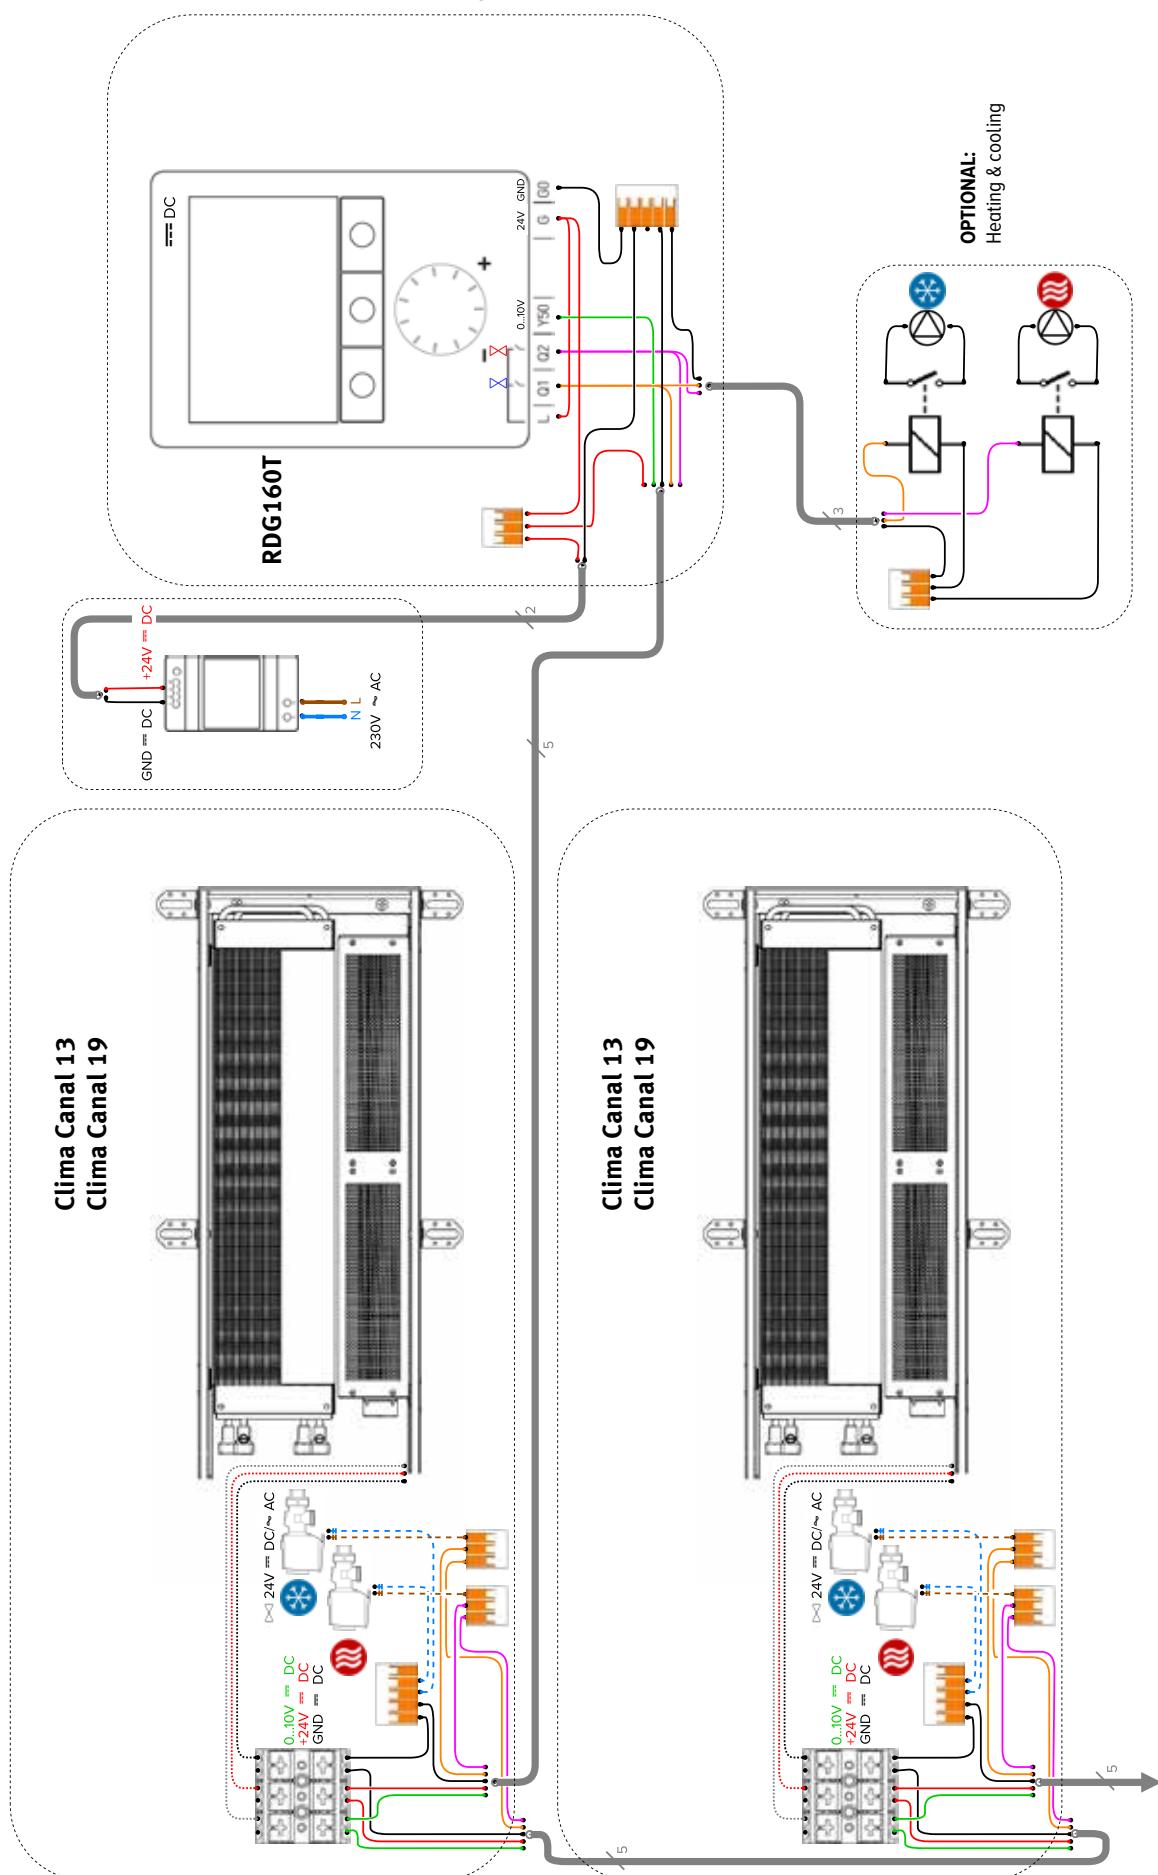

SAMPLE DIAGRAM 3: CLIMA CANAL

component power - thermostatic valve outside the unit - BMS -
2-pipe - temperature monitoring - JDPC - multiple units per area

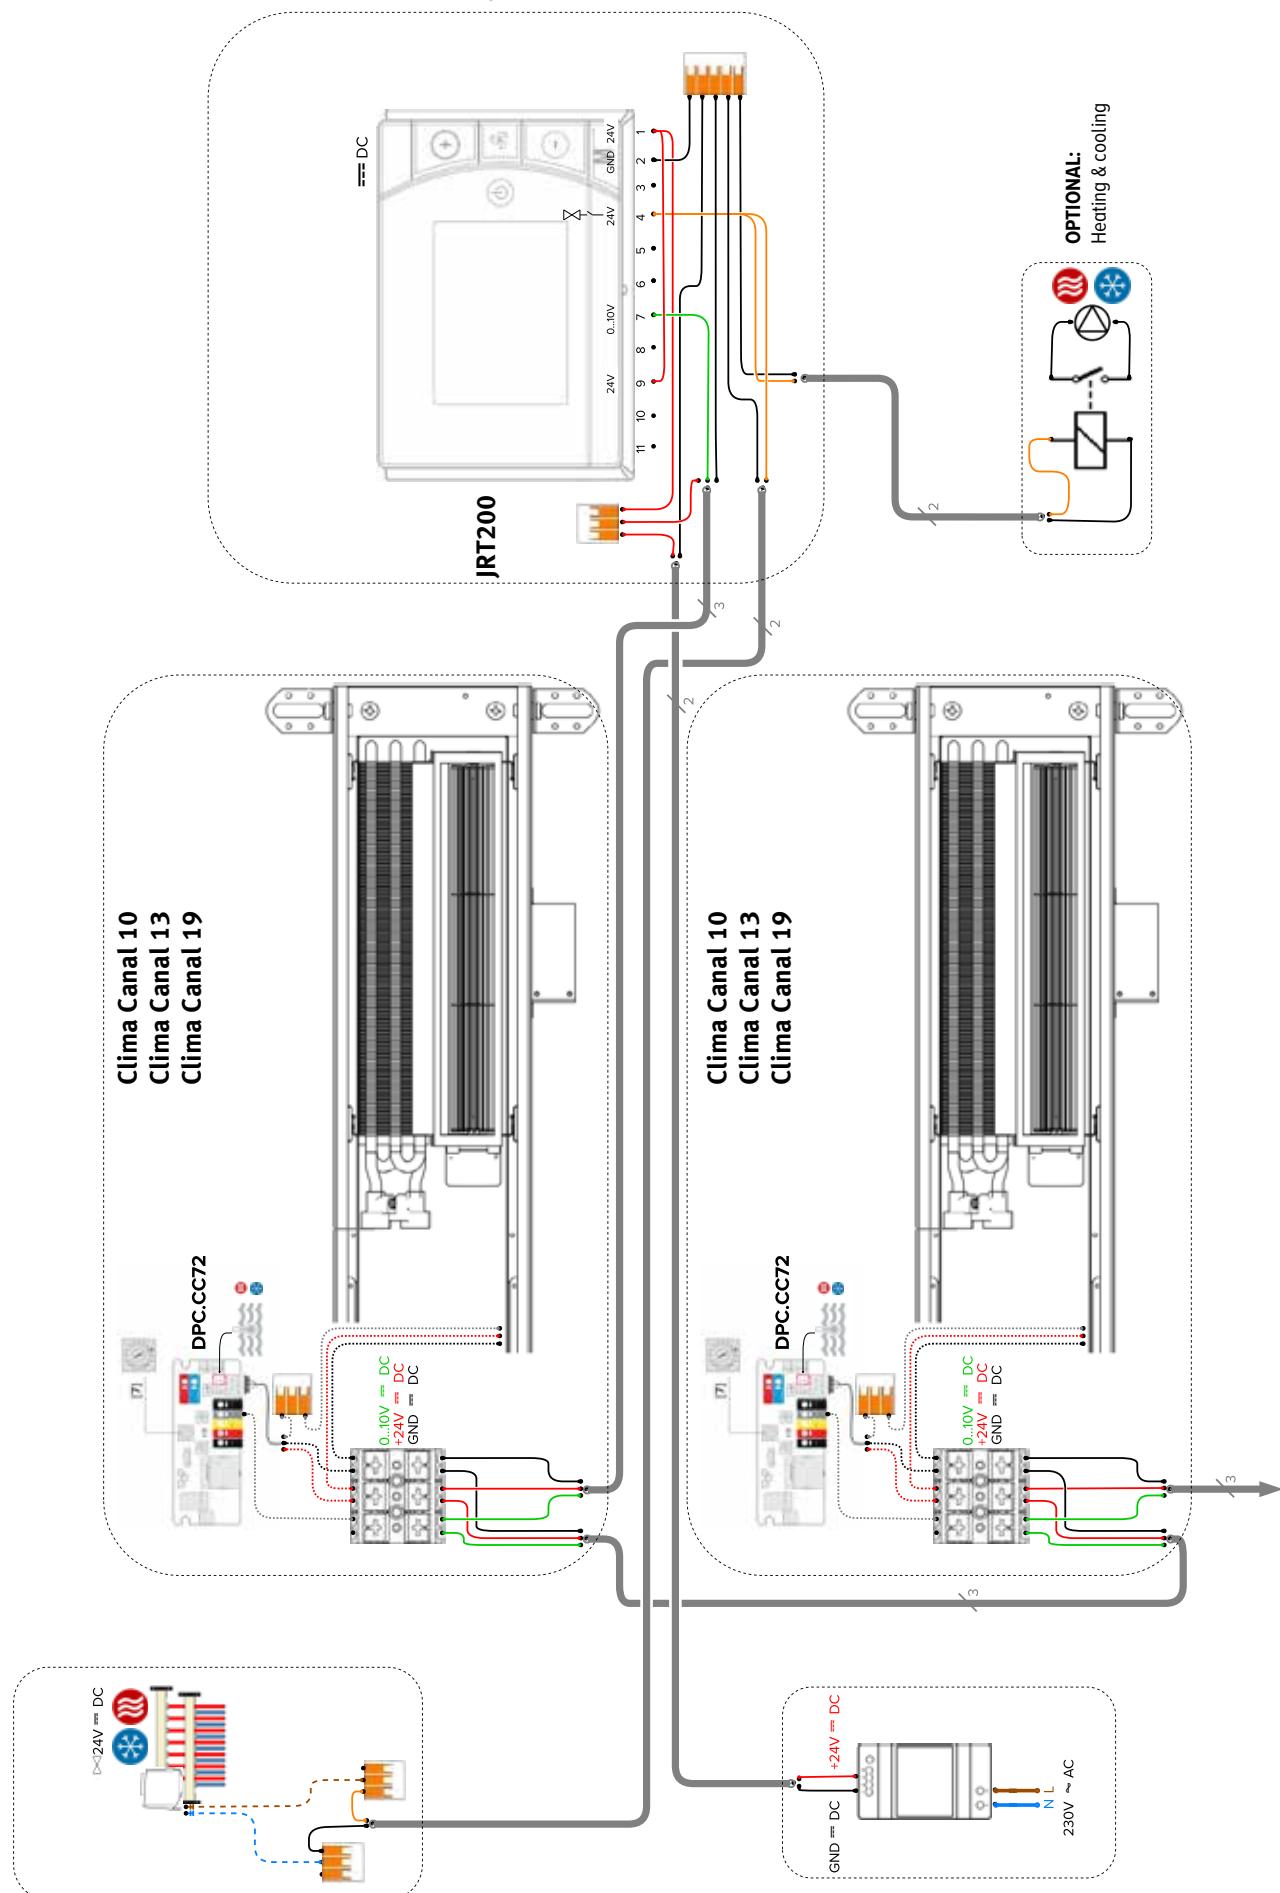

SAMPLE DIAGRAM 4: CLIMA CANAL

power supply DIN-rail assembly - thermostatic valve inside the unit -
RDG160T - 4-pipe - without temperature monitoring - multiple units per area

power supply DIN-rail assembly - thermostatic valve outside the unit -
JRT200 - 2-pipe - temperature monitoring - JDPC - multiple units per area

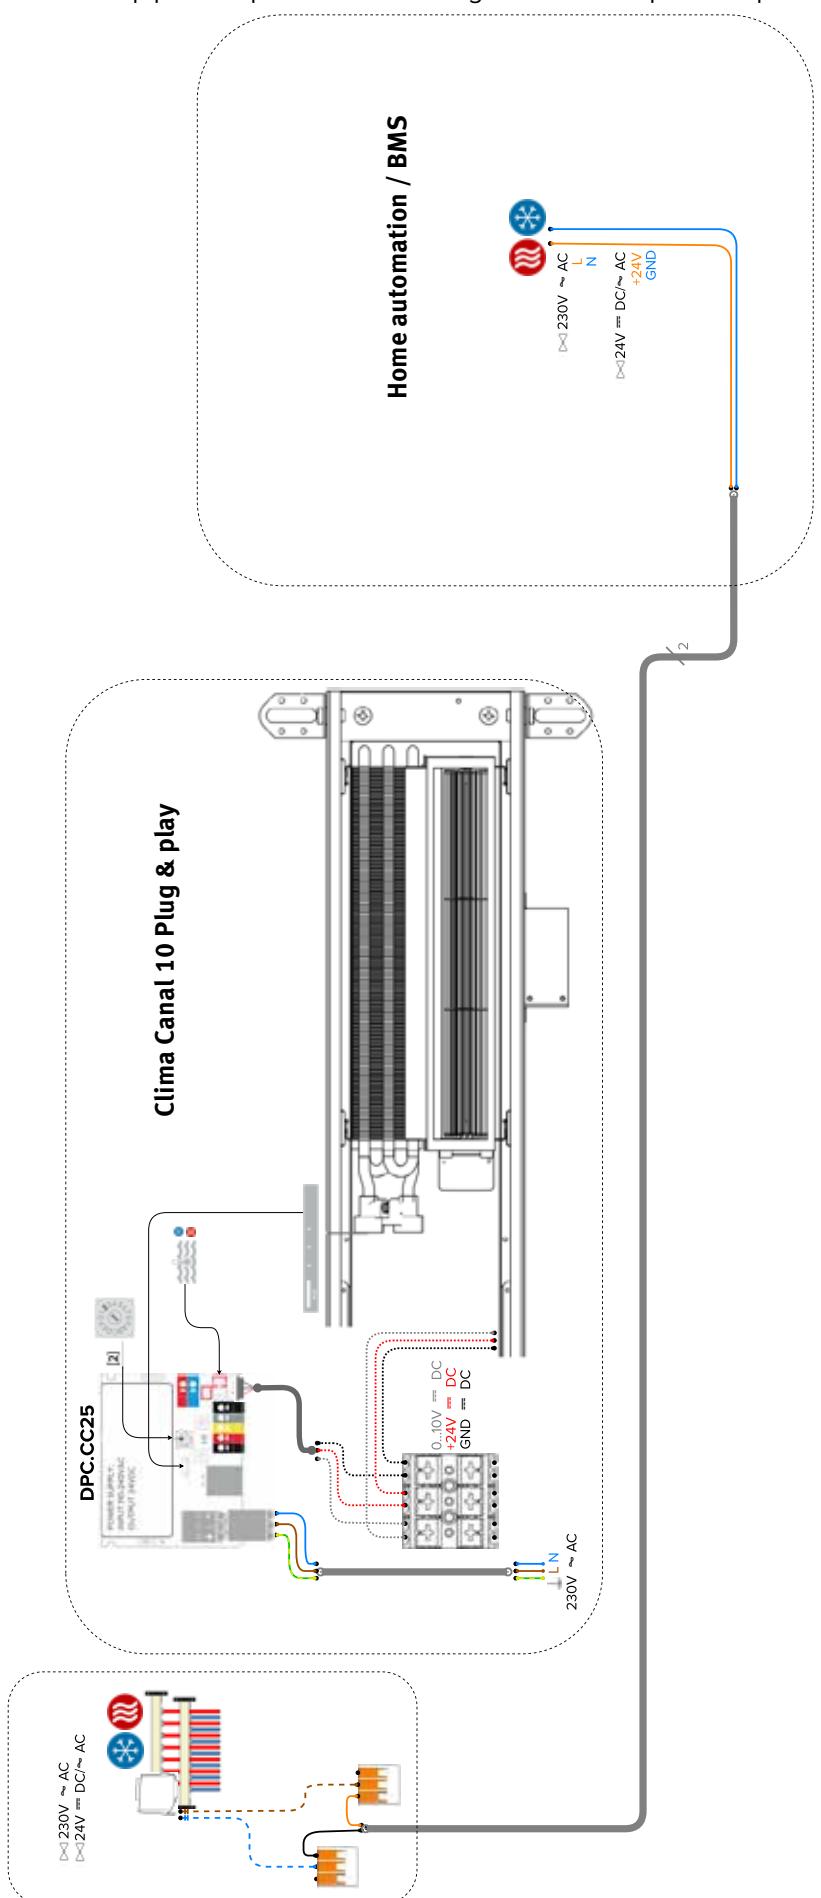

SAMPLE DIAGRAM 6: CLIMA CANAL

thermostatic valve outside the unit - 2-pipe - JDPC - 1 unit per area

SAMPLE DIAGRAM 7: CLIMA CANAL

power supply DIN-rail assembly - thermostatic valve outside the unit -
JRT200 - 2-pipe - temperature monitoring - JDPC - multiple units per area

CORRECTION FACTORS

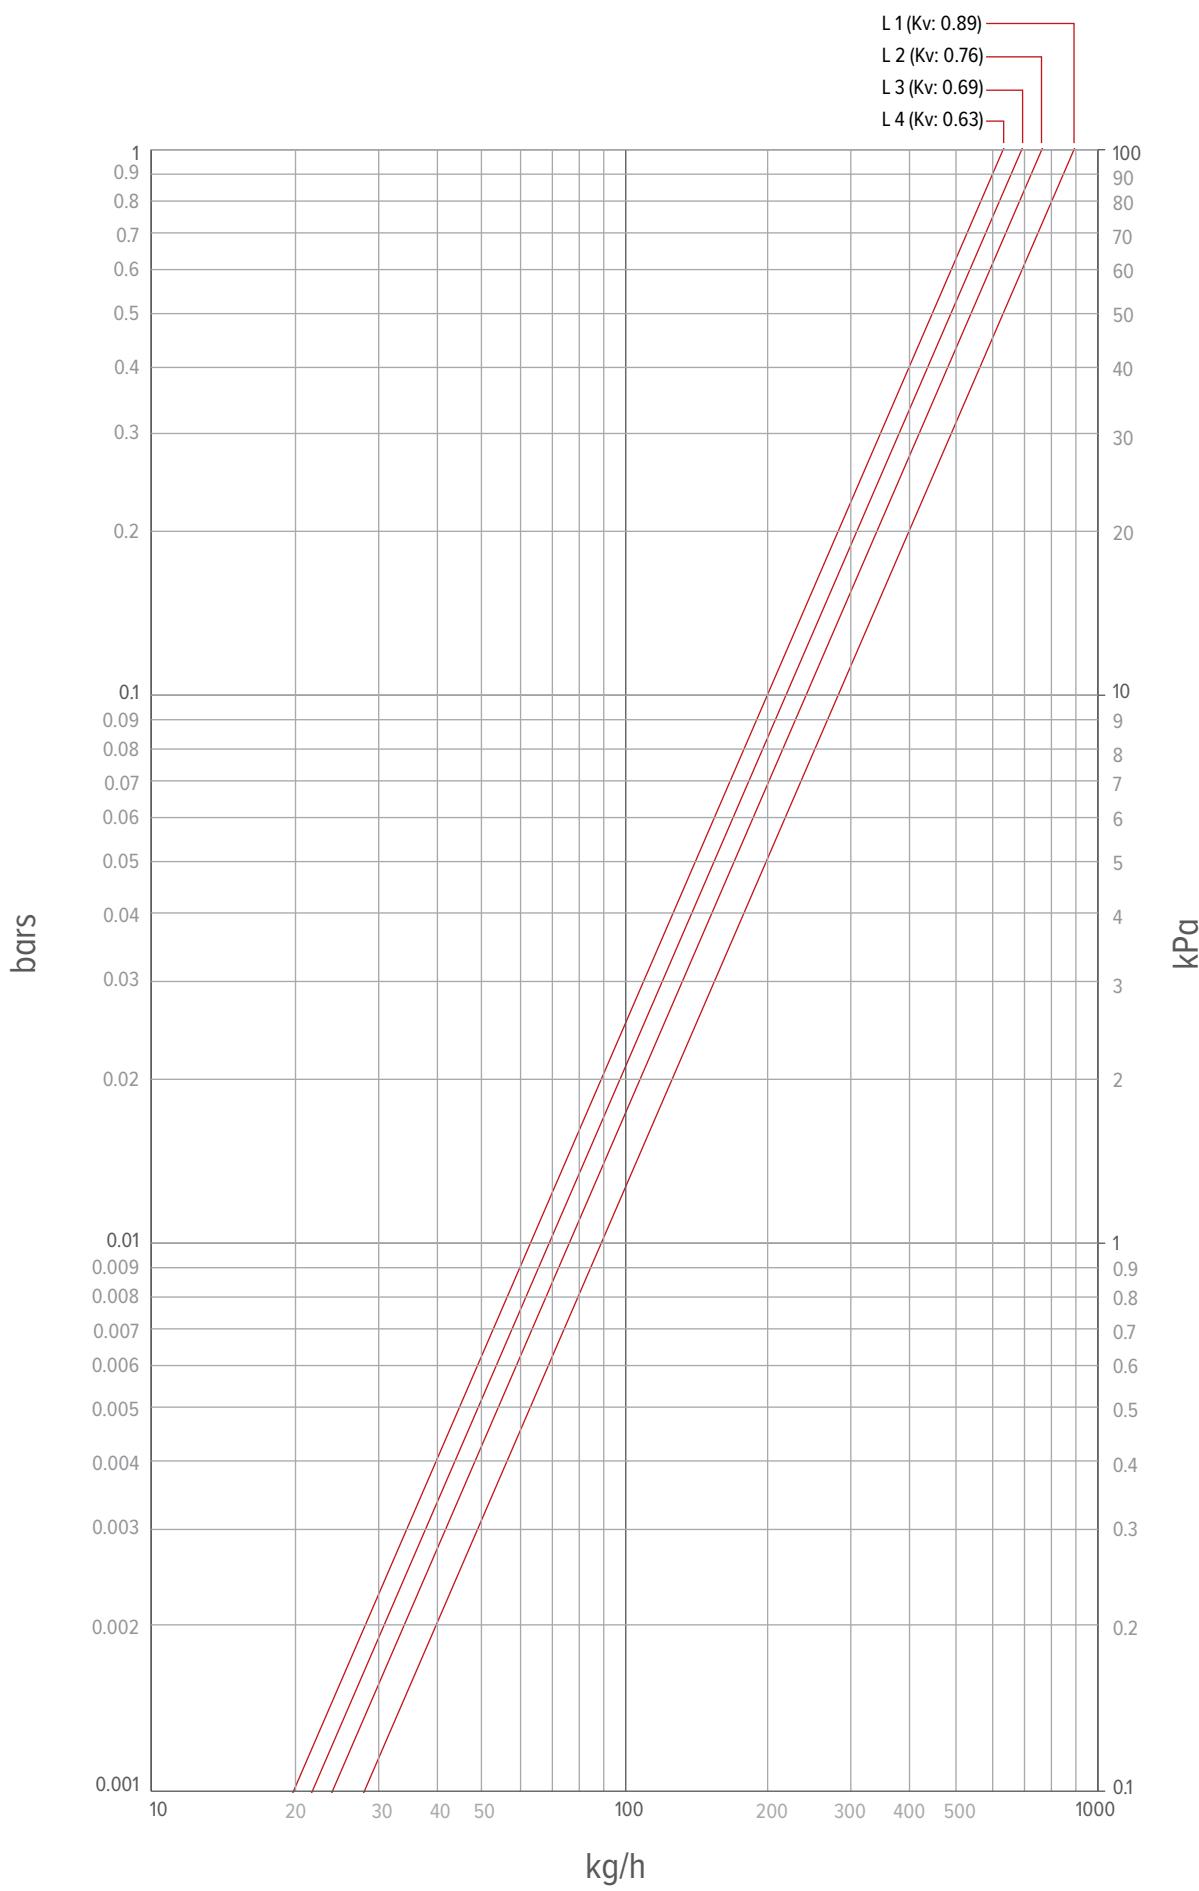

The indicated outputs with ΔT 50 and ΔT 30 are exact values. ΔT 50 output measured in accordance with EN16430 and ΔT 30 output calculated according to EN16430. An average correction factor is applied in this table for all other ΔT outputs, valid for all dimensions.

Click www.jaga.com/selection-tools/ to download the calculation tools with the exact outputs. The online calculation tools are kept up to date with the most recent data. Minor output differences between printed tables and the different online calculation tools are therefore completely normal and within the margins of tolerance imposed by the standard.
